

PROACTIVE CYLINDER MANAGEMENT

You can finally have confidence in your cylinder records with our web-based system for tracking physical assets and sharing data across companies. Our disciplined 5 point scan process (Fill – Load – Ship – Return – Unload) ensures every transaction is accurately and reliably recorded.

Mobile devices track cylinder movement

- 100% of our cylinder fleet is barcoded
- Nothing is delivered or removed from your property without a scan

Web based reports available to you include:

- Detailed transaction history
- Current inventory status
- Detailed asset listing
- Cylinder balances by department

Real-time telemetry

- Receive text or email alerts based on re-order or critical thresholds
- Red Ball automatically replenishes empty cylinders

On-line retrieval of Certificates of Analysis (CoA)

On-line retrieval of Safety Data Sheets (SDS)

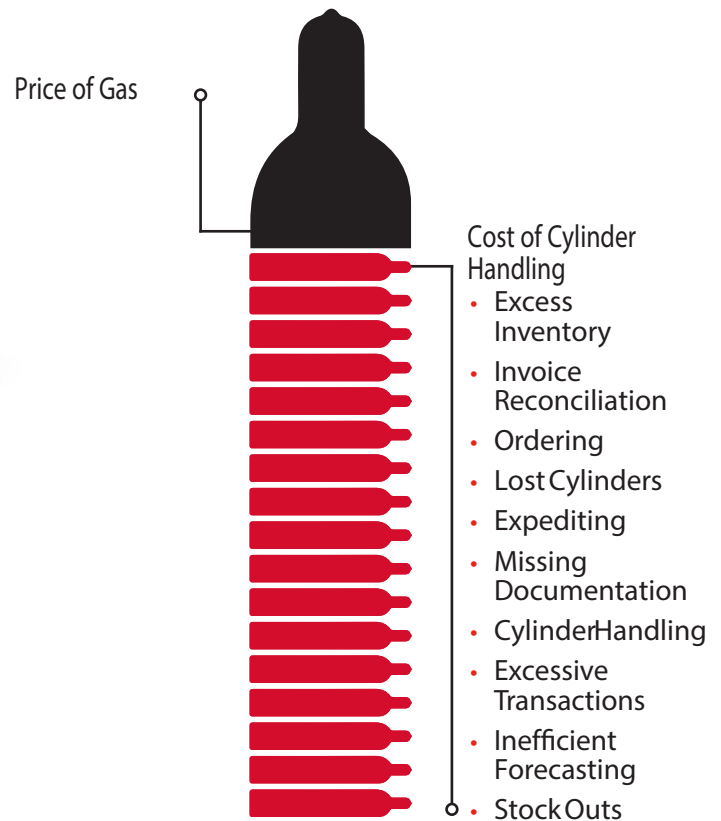

Simple, reliable deliveries with 100% uninterrupted gas supply.

- All cylinders stocked locally and ready for delivery
- All cylinders delivered and removed by our qualified hazmat employees

The only tool you need to view real-time balances and transaction history.

THE COST OF MIS-MANAGEMENT

What do you spend annually on these non-value added activities?

CONSIDER THE FOLLOWING FEATURES WHEN COMPARING TRACKING SYSTEMS:

- Every cylinder in our entire fleet is barcoded
- Every facility and driver is equipped with a hand-held device
- Secure internet access for facility managers and purchasing staff to view real-time balances and transaction history
- Our 5 point scan process (fill – load – ship – return – unload) ensures that each customer is appropriately credited for returns
- Cylinder reports to identify non-moving stock and potentially lost cylinders
- Comprehensive closed-loop tracking ensures that even if someone else returns one of your cylinders, you will receive credit
